

## **Steve Jones**

### ***Vice President – Business Development and Marketing***

Steve started his career at **United Consulting** in January, 1987 after receiving his degree from Purdue University with a BS in Construction Management. Initially, Steve worked in the Construction Engineering Department and had the opportunity to manage and inspect the construction of transportation improvement projects throughout Indiana. In the early 1990's, Steve was promoted to the Land Acquisition Manager and was responsible for growth and development of this department. In 1999, Steve became a Vice President and principal in the firm. Currently, Steve oversees Marketing and Business Development.

Steve works with our clients to ensure they receive the appropriate funding and service required to complete a project from start to finish. He works with statewide governmental agencies in initiating and identifying Public Works Projects that benefit the community. After the project has been identified, he helps develop project funding strategies and procurement of funding through varying programs, including local revenue sources, state & Federal grants and Federal transportation funding.

Once the project is funded, Steve provides comprehensive project oversight including scheduling, budgeting, contract administration, and client administration and coordination to deliver completed construction projects. He has assisted with numerous types of projects including: transportation, bridge replacement and rehabilitation, water & wastewater facilities, clean water distribution, and utility relocations.
